Priority Number: 2000-07-04 JP20000000202808

Abstract: PROBLEM TO BE SOLVED: To provide dry type tissue for washing the body which is normally dry, is in an extremely thin sheet-like form and is not only excellent in portability but is impregnated with a detergent for washing the body extremely easily soluble in water and therefore enables a user to extremely easily wash the hands and the feet insofar as water is available.

SOLUTION: The dry type tissue for washing the body is formed by impregnating a pliable porous sheet material with the detergent for washing the body dissolved in a solvent, then volatilizing the solvent to adhere the detergent to the sheet material. 1; The porous sheet material, 2: a storage tank, 3: a soap liquid, 4: a dryer, 10: the dry type tissue for washing the body.
